Verbindungs-Setup

The screenshot shows the 'COMbricks connection' dialog box. On the left, a list of connections is shown with 'Connection 1 (ip/dns=192.168.1.230, nw=1)' selected. Below this list are 'Connect', 'Disconnect', and 'Close dialog' buttons. The 'Current state: Idle' and 'Last connection status:' are also visible. A note at the bottom states: 'Continuous transfer only possible for 1.5Mbps or lower and if TCP/IP bandwidth is sufficient.' On the right, the 'Connection Settings' panel contains the following fields: 'Name' (Connection 1), 'IP Nr./DNS name' (192.168.1.230) with a 'Discover IP Nr.' button, 'Port' (38888) with '< Default (38888)', 'Network Nr.' (Network 1), 'Use Password' (unchecked), 'Username' (Admin), and 'Password' (masked with asterisks). Below these are 'Add', 'Update', and 'Remove' buttons. Green callout boxes provide the following annotations: 'Verfügbare Verbindungen' points to the connection list; 'Starte Verbindung' points to the 'Connect' button; 'Wichtige Parameter! (Netzwerk, Nutzer und Passwort)' points to the 'Network Nr.', 'Username', and 'Password' fields; 'Start des Discovery Tools (optional)' points to the 'Discover IP Nr.' button.
